## **About FDP (Content)**

*Innovation is the key to human growth. In present scenario, individuals come to rely on embedded knowledge and reduce their participation in spontaneous interactions with their colleagues. Thus individuals become less creative and face a lack of research aptitude and thus potentially reducing the value of new knowledge. Therefore individuals experience fear, pressure and uncertainty and feel confused at the prospect of unlearning an old habit and implementing a new one, which could hinder their learning process. Hence unlearning shows us the way and gives us new paradigm.*

*The topics to be covered in the programme :*

- Learning & Unlearning
- Innovative thinking/ systematic thinking
- Understanding Creativity
- Searching for new idea
- Understanding theory of human growth
- Continuous improvement

## **About the Trainer**
